

Project Design Phase

Problem – Solution Fit Template

Date	07 July 2026
Team ID	
Project Name	Visualization tool for electric vehicle charge and range analysis
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ Understand the existing situation in order to improve it for your target group

Template:

PROBLEM-SOLUTION FIT CANVAS

Purpose / Vision
To build an interactive and user-friendly visualization tool that helps users analyze and compare the charge time and driving range of electric vehicles for informed decisions.

Version
1.0
Date: 15 February 2025

Define CS, fit into CL	1. CUSTOMER SEGMENT(S) CS - EV Buyers / Potential Customers - EV Owners - Researchers & Students - Automobile Companies - Government & Policy Makers - Environmental Organizations	6. CUSTOMER LIMITATIONS EG. BUDGET, DEVICES CL - Limited technical knowledge of analytics tools - Internet connectivity issues for online access - Incomplete or outdated datasets available - Limited access to premium analytical tools - Budget constraints for advanced software	5. AVAILABLE SOLUTIONS PROS & CONS AS - Online EV comparison websites - Manufacturer websites - Excel spreadsheets - Static reports / Articles CONS: - Limited visualization and interactivity - Data not always up-to-date - Difficult to compare multiple parameters	Explore AS, differentiate
Focus on PR, tag into BE, understand RC	2. PROBLEMS / PAINS + ITS FREQUENCY PR - Difficult to compare charging time, battery capacity and driving range across EV models. - EV data is scattered across multiple sources. - Hard to identify the best EV based on performance and specifications. - Limited visual representation of data. - Manual comparison is time-consuming and error-prone.	9. PROBLEM ROOT / CAUSE RC - EV information is available in different formats and platforms. - Lack of a centralized platform for visualization and comparison. - Large datasets are difficult to interpret without visual insights. - Existing tools are not user-friendly or interactive.	7. BEHAVIOR + ITS INTENSITY BE - Searches online for EV data and reviews. - Compares charging time, battery capacity, and driving range. - Uses filters to analyze different EV models. - Relies on visual insights before making purchase or policy decisions.	Focus on PR, tag into BE, understand RC
Identify strong TR & EM	3. TRIGGERS TO ACT TR - Need to compare EV models before purchase. - Increasing adoption of electric vehicles. - Need for accurate and reliable EV information. - Requirement for quick, data-driven decisions.	10. YOUR SOLUTION SL Visualization Tool for Electric Vehicle Charge and Range Analysis - Import EV dataset (Excel/CSV) into Tableau. - Clean and preprocess data for analysis. - Create interactive dashboards with charts and KPIs. - Compare charging time, battery capacity, and driving range of EVs. - Apply filters (model, manufacturer, year, capacity, etc.) for detailed insights. - Provide clear visual insights to support better decision-making.	8. CHANNELS OF BEHAVIOR CH ONLINE - Tableau Dashboard (Web / Tableau Public) - GitHub Repository - Web Browser Access OFFLINE - Project Reports (PDF / Docs) - Presentations / Demonstrations - Academic Projects & Seminars	Extract online & offline CH of BE
