| Team ID       |                                                                    |
| Project Name  | Visualization tool for electric vehicle charge and range analysis. |
| Maximum Marks | 4 Marks                                                            |

#### Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

#### Step-1: Team Gathering, Collaboration and Select the Problem Statement

The screenshot displays a Mural workspace with three main panels. The left panel, titled 'Brainstorm & idea prioritization', includes a lightbulb icon, a description of the template's purpose, and a timeline: '10 minutes to prepare', '1 hour to collaborate', and '2-8 people recommended'. The middle panel, 'Before you collaborate', provides a 10-minute preparation guide with three steps: 'Team gathering' (defining participants), 'Set the goal' (focusing on the problem), and 'Learn how to use the facilitation tools' (using Mural's features). The right panel, 'Define your problem statement', features a 5-minute timer and a central box with the problem statement: 'How might we analyze EV charging and vehicle range using dashboards?'. Below this, a 'Key rules of brainstorming' section lists six rules: Stay in topic, Encourage wild ideas, Defer judgment, Listen to others, Go for volume, and If possible, be visual. A bottom navigation bar shows a smiley face icon and a 'SS' icon with a star.

#### Step-2: Brainstorm, Idea Listing and Grouping

2

## Brainstorm

Write down any ideas that come to mind that address your problem statement.

🕒 10 minutes

### TIP

You can select a sticky note and hit the pencil [switch to sketch] icon to start drawing!

#### Person 1

Analyze EV charging duration

Compare vehicle ranges

Study battery capacity impact

#### Person 2

Charging station usage analysis

Identify charging trends

Compare EV models

#### Person 3

Range vs battery efficiency

Daily charging pattern analysis

Dashboard with interactive filters

#### Person 4

Geographic EV data visualization

Predict range performance

User-friendly dashboard design

#### Person 5

EV charging speed analysis

Battery health monitoring

Charging cost comparison

#### Person 6

Fast charging vs normal charging

State-wise EV usage analysis

Energy consumption analysis

#### Person 7

Vehicle performance trends

User dashboard customization

Charging station availability

#### Person 8

EV adoption insights

Charging station usage analysis

Range vs battery efficiency

## Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

🕒 20 minutes

### TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

### Charging Analysis

### Range Analysis

### Dashboard Analysis

### Charging Analysis

### Range Analysis

### Dashboard Analysis

## Step-4: Idea Prioritization

## Prioritize

20 minutes

Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the H key on the keyboard.
